Keystone Linear

A Straightforward Multipurpose Wall System

Keystone Linear is a versatile, modern concrete retaining wall system designed for residential and commercial use. Each block is double sided and features a closed end that can be used for corners. Use the coping unit as a stand-alone step or integrate it perfectly into an existing Keystone Linear wall. Pieces can be installed flush or pushed in or out to create a randomized facade.

Garden Walls

Grand Walls

SIZES (H X W X D)

Standard
178 x 1000 x 350
7 x 39.37 x 13.78

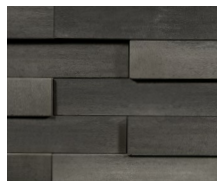

Coping
178 x 1000 x 350
7 x 39.37 x 13.78

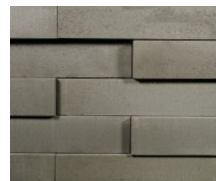

COLOURS

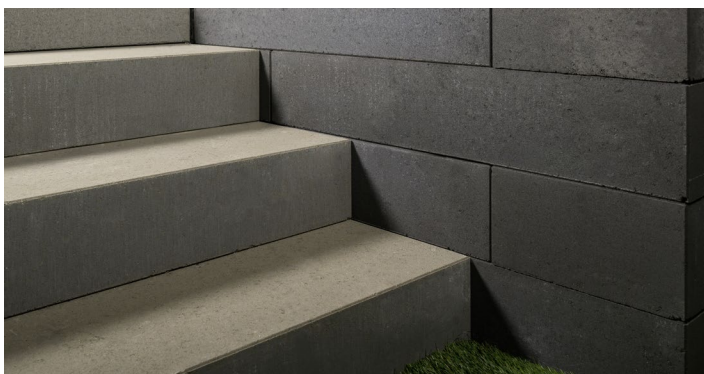

Charcoal

Graphite

Natural

PATTERNS

[illegible]

Pattern 1

INSTALLATION NOTES

Use 2 fiberglass pins per block or 3 for extra shear strength if desired. For near vertical batter, place pins in front hole location. The largest batter is 1" or 8 degrees. The 0.5" offset is 4 degrees. Straight walls can be double sided with batters

on both sides. Alignment pins sold separately. Coping units should be used for steps. For more in depth installation guides for specific products, visit **BarkmanConcrete.com**.
